<u>How was it with no power at school?</u> (Question by Brooke Levien) Thank you so much for the coffee! It feels different without technology because students are asking to do things that require electricity. Food was provided because we have a gas stove and incredible staff. The students had the same meal that was planned. When the power came back on the students asked to turn it off. <u>Did the fire alarms work when the power is out?</u> (Question by Gina Teliho) That was one of the reasons private schools did not have school.
